- *Advanced* MicroFine Droplet Technology™ for exceptional photo quality
- Precision Color Distribution Technology featuring ultra-fine, 5-picoliter droplets
- Professional results on plain paper

The Professional Printer for High-Quality Performance.

The S630 Color Bubble Jet Printer from Canon brings impressive, high-end performance and great value to desktops everywhere. It delivers remarkable speed and exceptional photo quality. Plus, you'll find a whole lot of advanced features that make printing incredibly quiet and easy and everyday results truly spectacular. And because it features both USB and parallel ports, it's the ideal companion to any compatible Mac® or PC.

Incredible results on plain paper.

Print laser-sharp letters, flyers and Web pages at up to 17ppm in black and up to 12 ppm in color. The S630 printer speeds through projects without compromising quality. At an incredible 2400 x 1200 dpi in color, resolution is 38% greater than 2880 x 720 dpi printers. *Advanced* MicroFine Droplet Technology further refines color, precision and detail for breathtaking photo printing even on plain paper. And Canon's exclusive Precision Color Distribution Technology ensures high-quality output and accurate color reproduction even in draft mode.

Intelligent ink management.

The S630 printer features the Canon Think Tank System™—an intelligent ink-management system that helps eliminate ink waste. It uses individual ink tanks for each color, so you replace only the color you need as it runs out, not the entire cartridge. The Canon Think Tank System also features a unique low-ink sensor that alerts you with an on-screen message when ink-levels are low. So you can drop in a new tank before running out of ink unexpectedly in the middle of a print job.
